OVERVIEW

High performance without compromise. The Series 76 is a heavy-duty, quarter turn electric actuator ideal for industrial valve automation. Available in various power voltage supplies and designed for on/off and modulating applications for a wide range of markets and industries.

The Bray series 76 is a quarter-turn industrial electric actuator with manual override for use on any quarterturn valve or damper requiring up to 79k in-lbs (9,000 Nm) of torque. Operating speeds vary between 17 to 130 seconds depending on torque, voltage, and frequency.

KEY FEATURES

- > Torque up to 79,000 in-lbs (9,000 Nm)
- > 3-Phase, 1-Phase, & DC Power
- > Special High torque induction motor with built in thermal protection to protect against overheating
- > Direct mounts to most quarter turn valves according to EN ISO 5211, resulting in a lower profile
- > Continuous valve position indication even on loss power
- > Padlockable declutch system for manual operation
- > Integral control station options
- > Removable blank bushing for ease of machining
- > Self-locking worm gear design eliminating the need for a motor brake
- > 4 Limit Switches standard on most sizes
 - Additional auxiliary limit switches available
- > Torque switches standard in actuator size 2 and above
- > Anti condensation heater
- > Permanently lubricated
- > Up to 28 point terminal strip

APPLICATIONS

**On/Off
Modulating Control**

PERFORMANCE

Output Torque	See Torque Chart
Voltages	See Motor Chart
Ambient Temperature	-4°F -20°C to 140°F +60°C -40°F -40°C to 140°F +60°C Opt.
On/Off Applications	Per EN 22153 Class A
Modulating Applications	Per EN 22153 Class C

SPECIFICATIONS

Voltage	> 3 Phase: 220V, 380V & 460V > 1 Phase: 110V, 220V & 240V AC > 24V DC, 24V AC/DC
Torque rating	> 3 Phase: Torque up to 79,000 in-lbs (9,000 Nm) > 1 Phase: Torque up to 26,500 in-lbs (3,000 Nm)
Certifications	Weatherproof: FCC, ICES, CE, UKCA, CSA Explosionproof: FCC, ICES, ATEX, IECEx, CSA
Enclosure Ratings	> NEMA: 4, 4X, 6 > Ingress Protection: IP66/67 > Submersible: IP68 (Optional)
Main Housing	> High grade aluminum alloy > Anodized interior and exterior > Polyester powder top coated
Position Indicator	Top mount visual position indicator
Travel	90 degrees +/- 5°
Motor	Squirrel Caged AC Induction Motor > Class F Motor Insulation 311F (155C) > Embedded thermal protection 275F (135C) DC Brushed Motor > Class B Motor Insulation 266F (130C)
Duty Cycle	S4 Per EN 60034-1
Control Options	> Potentiometer: 1K Ohm > Position Transmitter: Output Signal: 4-20mA dc > Modulating: 0-20mA, 4-20mA, 0-5V, 1-5V, 0-10V, 2-10V > Local Control Stations
Conduit Entries	Weatherproof: Sizes 1 thru 5 = 3x 3/4" NPT or 3x M20 Sizes 6 thru 7 = 2x 3/4" NPT + 1x 1" NPT or 2x M20 + 1x M25 Explosionproof: 2x 3/4" NPT or 2x M25
Drive Bushing	Removable Drive Bushing
Mounting	ISO 5211/MSS SP-101
Lubrication	Grease moly EP type
Manual Override	Declutch Mechanism, which can be padlocked.

FEATURES & BENEFITS

FEATURES

1 High Visibility Position Indicator: The display indicates valve position through the full range of travel. The O-ring sealed dome is made of high impact, heat, chemical and ultraviolet resistant clear polycarbonate and designed to withstand caustic wash down ensuring excellent corrosion protection.

Weatherproof: Sizes 1 through 4 and size 6 have top mount dome, prominently labeled and color coded yellow for open, red for close. **See Fig. 1.**

Sizes 5 and 7 using an auxiliary gearbox will have a clear dome with green markings indicate open while red indicates closed. **See Fig. 2.**

Explosionproof: Sizes 1 through 5 uses flat indicator window dial. **See Fig 3.**

2 Enclosure: The housing is fully anodized internally and externally, with a polyester powder topcoat applied to ensure corrosion, wear, and UV resistance in the harshest environments.

3 Captive Cover Bolts: The cover is attached to the base by captive stainless-steel bolts placed outside the sealing area.

4 O-ring Seal: The o-ring between the cover and base provides environmental sealing preventing internal corrosion.

5 Manual Override: Hand-operated declutch lever physically disconnects the motor drive from the handwheel for manual operation. The lockable lever prevents any unauthorized operation.

6 Mechanical Travel Stops: Designed to prevent over-travel in the open or close direction during manual operation. Travel stops bolts include a locknut to prevent loosening, and seals to prevent water ingress.

Figure 1: Sizes 1-4, and Size 6.

Figure 2: Sizes 5 & 7.

Figure 3: Sizes 1-5.

FEATURES & BENEFITS

FEATURES

- 7 Motor:** Fan cooled, high torque, squirrel Caged AC Induction Motor with Class F insulation or DC brushed motor with Class B insulation.
- 8 Limit Switches:** Rotary switch type for easy configuration. 4 limit switches standard.
 - > 2 Available for position feedback.
 - > Additional limit switches available
- 9 Torque Switches:** Open and close torque switches protect the valve for actuator sizes 2 and above. Switches are set at unit rating to eliminate nuisance tripping.
- 10 Heater:** Thermostatically controlled to combat condensation build-up in the unit.
- 11 Local Control Station:** Integral to actuator housing. Local-Remote-Stop padlockable selector, Open-close selector, Power (white), Open/ Opening (Red), Remote (Blue), Close/Closing (Green) and Fault (Yellow) LED lights. Available as an option for 1 Phase and standard in 3 phase.
- 12 Output Drive:** Double reduction worm gear design allows output motor torque to be transmitted to the valve. The design incorporates a self-locking feature preventing external forces adversely effecting desired valve position and equipped with anti-rotation mechanism.
 - > Worm: Alloy Steel
 - > Worm Gear: Bronze
- 13 Mounting:** Optional flange sizes for easy installation to any valve type and size per ISO 5211
- 14 Conduit Entries:** Incoming power and control cable connections. Standard protective plastic covers.

PART NUMBERING SYSTEM

Select one code from each category to build a complete actuator order number.

NOTES:

- Additional auxiliary (ALS) are available in modulating sizes 1X & 1Y only when a local control station is installed.
- Not available in sizes 1A/1X & 1B/1Y.
- Please refer to the technical sales manual for machined bushing option details.
- Indicates Bracket and adapter required.
- Blank bushing unmachined does not require a bushing code
- For combination of available options please refer to the configurator tool and price book.
- All units come with space heater.

OPTIONS

AUXILIARY LIMIT SWITCHES

In addition to the limit switches used to control the 'open' and 'closed' travel limits, actuators sized 2 through 7 have two auxiliary switches installed as part of the standard configuration. These auxiliary switches are assembled so that they are activated 3 degrees before their associated limit switch. Actuators are available with an additional set of auxiliary switches.

AUXILIARY TORQUE SWITCH

Mechanical Torque switches are a standard factory-installed and calibrated feature for series 76 actuators, sizes 2 through 7. Torque switches are not able to be installed in the size 1. Installation is simple, but due to the requirement for special calibration equipment, it is not available for field installation. Actuators, size 2 through 7, are available with an additional set of torque switches.

POTENTIOMETER

A 1k Ohm potentiometer, standard in modulating applications, is available in on/off applications for direct feedback of position. The potentiometer is factory-calibrated for precise position feedback.

POSITION TRANSMITTER

An analog position transmitter is an available option for on/off applications in 1-phase and 3-phase models. The analog transmitter uses a potentiometer to provide continuous valve feedback of a 4-20 mA output signal with accuracy down to +/- 0.5%.

AC & DC MODULATING CONTROL CARDS

The Series 76 offers precise modulating service for accurate position control.

- > One touch automatic calibration
- > Advanced control of proportional band and dead band
- > Self diagnostics
- > Action on loss of command signal
- > Go to position commands

LOCAL CONTROL STATION (LCS)

The LCS (Local Control Station) offers comprehensive control and monitoring capabilities tailored for the Bray Series 76 Electric Actuator for On/Off and Modulating applications. The LCS is equipped with a local, remote, and stop selector switch and a spring return open, close drive switch.

Enhancing operational awareness and facilitating efficient maintenance, the LCS is outfitted with LED indication to display the valve’s open and close positions, the selection mode (local or remote), power status, and fault indication.

5Y				57	253		

NOTES:

1. Torque ratings dependent of certification and power voltage.
2. Handwheel to Actuator Output: Actuator shall be designed to produce the required operating torque with a maximum rim pull of 80 lb. (356 N) on the handwheel.
3. *Size 1X and 1Y have 8.8 and 10.3 handwheel turns (respectively) for ATEX/IECEx units.

NOTES

1. Machining outside of the maximum allowable diameter may cause damage to the actuator and void the warranty.
2. Valve codes **A, B, C, D, & E** are Double D type. **F, G, H, & F25-2** are Bore & Key.
